Mastering Builds: the First Step to Deployment in Power Platform

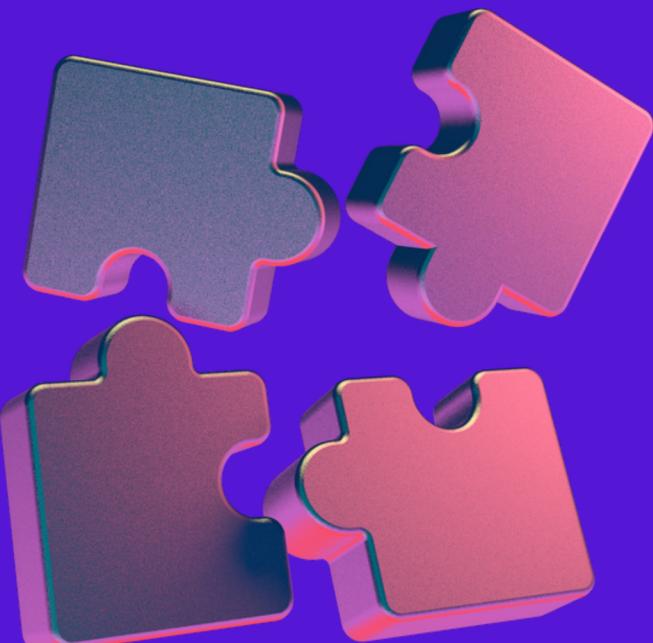

KATERINA CHERNEVSKAYA

SWIPE >

TERM OF THE DAY: **BUILD**

the process of compiling the various components contained in a solution into a package that is ready for deployment

KATERINA CHERNEVSKAYA

SWIPE >

TERM OF THE DAY: **BUILD**

In Power Platform, builds involve collating various components, like apps, flows, configurations, into a deployable unit to ensure they function cohesively in a runtime environment.

TERM OF THE DAY: **BUILD**

Examples

Initiating a build process to compile a new version of a Power App

Building a solution package before moving it to a higher environment for testing

KATERINA CHERNEVSKAYA

SWIPE >

TERM OF THE DAY: **BUILD**

think of builds as
the backstage crew in a play,
setting the stage perfectly for
the main actors (the apps)
to perform!

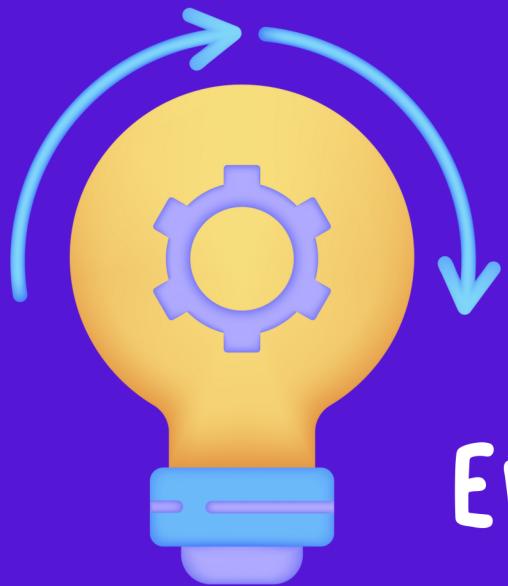

KATERINA CHERNEVSKAYA

SWIPE >

TERM OF THE DAY: **BUILD**

Ensure meticulous build management for seamless deployments in the Power Platform ecosystem.
